

**Fish and Royer Lake Association Board Meeting via Zoom Minutes**  
**Thursday, April 29<sup>th</sup>, 2021**

A closed board meeting was called to order by Joyln Strahm around 4:10pm. Present were Board Members Jolyn Strahm, Dave McIntosh, Tom McCue, Jay Benak and Dave Schnieders. Also in attendance were Martine Franke, who is with the LaGrange County Soil and Water Conservation District, and Matt Horsley, who is a Fisheries Biologist with the IDNR District 2.

**DISCUSSION:**

The meeting was held to discuss watershed issues as they pertain to Fish and Royer Lakes' water quality. Many topics including gizzard shad, nutrient load, algae/turbidity and aquatic plant growth were brought up.

It was decided that the board request an application permit for planting or transplanting local, native plants to improve our lakes' quality.

It was determined that three people. Tom McCue, Dave McIntosh and Jill Hoffman(?), meet again to continue this discussion with Martin Franke at his office in approximately 4 weeks.
